Bakersfield, Feb. 19.—[By the Asso ciated Press.] As a southbound pas-senger train on the Southern Pacific Railroad was nearing Poso last night, and while about three miles north of that station, the engineer saw by the light of the headlight a queer-looking object laying near the right-hand rail. He was so close to the obstruction that it would have been impossible to stop his train in time to avoid striking it even if it had been of sufficient size to ook dangerous. As it was very insignificant in appearance, however, he paid little attention to it.

When the driving-wheels of the local motive passed over the object there was a terrific explosion, and the cab was enveloped in a sheet of flame. The in-significant object proved to be a heavy charge of some dangerous explosive Fortunately the engine was heavy and held to the rails, while the momentum of the train carried it quickly over the

When the train had slowed down sufficiently to permit the engineer to get down on the steps he was astounded to find the brakebeams on the engine and express car trucks on fire. The train was stopped and the flames extinguished.

A cry of "train robbers!" ran like wildfire through the crowded coach, and when the train stopped the passengers had all seen the flames from the explosion, and for a time a scene of inense excitement ensued. At Poso officers were notified and at once left for the scene of the explosion. Nothing has been heard from the posse

PARIS, Feb. 19.—[By Cable and Associated Press.] De Freycinet, chief of the cabinet, the members of which last night tendered their resignations, had a conference with the President this morning. Carnot requested De Freycinet to summon his colleagues to a meeting with the President at 3 o'clock this afternoon, when a prolonged discussion of the situation was held.

After the conference the ministers de-cided to send a collective resignation. In accordance with the programme decided upon, the ministers called on President Carnot and tendered him their joint resignations, which was ac-cepted. President Carnot strongly cepted. President Carnot strongly urged the ministry to reconsider, but De Freycinet insisted upon resigning, saying that he and his colleagues had decided that they could not remain in power after the action taken yesterday by the Chamber. Several generals today called on De Freycinet, who served as War Minister as well as Premier, and strongly appealed to him not to resign, saying that he will be a great loss to the army. De Freycinet, however, remained obdurate.

LONDON, Feb. 19.—[Copyright, 1892, by the New York Associated Press, It is freely stated that the Irish Local Government Bill, as presented in the Commons last evening, is the result of many stormy meetings of the cabinet and that Balfour was more than once overruled. Even the Standard admits this by saying that the bill is the result of a compromise, and its reception, as in the case of all compromises, has not been as satisfactory as its promoters could desire. Whatever may be the fate of the bill, there is no chance of appeal to the country on the measure; but everything intimates that the government is riding for a fall, and that a dissolution of Parliament will come when least expected. Defeat on some side issue would enable the government to appeal to the country without appearing to have unduly precipitated a dissolution in order that the neglect of pledges may still be unrealized and at the same time the government would avoid alienating friends who object to some projected measures. to the country on the measure; but

some projected measures.

The thin ice over which the government is skating is indicated by the vote in the Commons tonight, when a resolution expressing regret at the appointment of a Welsh justice, ignorant of the Welsh language, was rejected by a ma-jority of only 23. The chance of de-feat does not conduce to the happiness of the government, Nearly sixty Conservative members are notoriously un-reliable, while fifty others disapprove the government's Irish policy and will probably absent themselves from a critical division.

A great sensation has been caused in the agricultural world by the report of a serious outbreak of pleuro-pneumonia in the Peace River district in Canada. If the report is true the outbreak will greatly affect Scotch farmers, who largely import Canadian cattle in preference to Irish cattle, owing to their immunity from disease. BITTER COLD WEATHER. The weather in Great Britain this week was most severe, with storms land and sea throughout the week.

Yorkshire the weather was the coldest in thirty years. The blizzard raging today was equal to that of last year. Snowstorms of unusual violence are raging in Ireland tonight and railway trains are greatly delayed. Near Limerick there are drifts four feet high. At Queenstown a heavy gale prevails. Mexican Reciprocity Negotiation CITY OF MEXICO, Feb. 19 .- A rumor is current that negotiations for a reciproc-

ity treaty between the United States and Mexico have been broken of and Mexico have been broken off. It is authoritatively stated, however, that negotiations are only temporarily suspended to allow the government to examine the counter propositions that have been made. A dispatch from Guatemala says that

business there is bad. Many failures have occured and a financial crisis is Striking Railroad Machinists.

CHICAGO, Feb. 19 .- A local paper says that a special committee of the International Machinists' Union has de-cided what action to take regarding the strike of machinists in the Pennsylvania Company's shops and this de-cision has been telegraphed to mem-bers of the executive board at different places. There is reason to believe the committee has recommended a strike on the whole system, but this is contin-gent upon the action of the Execctive

Committee. How the Springer Bill Will Work. Boston, Feb. 19.—The Boston Commercial will print tomorrow a statistical analysis of woolen imports into the United States on the basis of the new duties imposed by the Springer bill. In the fiscal year of 1891 imports of woolens were valued at \$48,235,409. The reduction in revenue if the same amount of goods is imported under the Springer bill would be \$29,918,183.

MISSION WORK.

The Closing Sessions of the Threedays' Conference.

The Usual Addresses and Papers Presented—Consecration Meeting in the Afternoon-Union Mission Ser-

The missionary conference of the First Baptist Church closed last evening, after a three days' most enthusiastic session. The programme yesterday was substantially the same as published in The Times of yesterday, the forenoon being occupied with addresses by Rev. W. Gregory, Dr. A. P. Brown and Rev. George E. Dye and Rev. N. L. Rigby. The first speaker showed the necessity of sacrifice in missionary work, the second spoke of medical missions and the third-named gentlemantook up the thought of the close alliance between missionary work and truly conscientious religious life. The last speaker was intrusted with the inlast speaker was intrusted with the inlast speaker was intrusted with the in-teresting subject of tithe giving, and in the course of his able address favoring the custom he cited Bibical authority, and gave many illustrations of its prac-ticability and benefit to the individual. All of the addresses were well pre-pared and delivered in a manner which commanded the most earnest attention

commanded the most earnest attention of every one present.

In the afternoon, after Rev. W. de R. Pos' talk concerning the preparation of missions, Mrs. P. W. Dorsey took up the subject of woman's work, clearly showing in the course of her paper that in evangelical work as elsewhere woman's sphere is one of the broadest and grandest.

grandest.

"Young People and Missions," by Rev. John D. Rumsey, was another most interesting feature of the programme, it being held that the youngest child might prove an important factor in conducting Christian work.

At 4:80 o'clock Rev. Daniel Read led in a consecration service, which reputed

in a consecration service, which resulted in a stirring up of religious fervor such as is rarely experienced even at meet-ings of this character. The evening session was occupied in The evening session was occupied in the earlier part by Dr. A. J. Frost, who by means of a chart and bewildering statistics showed that at the present rate it would take ages and ages, or as he put it, "eternities and eternities," he put it, "eternities and eternities, before the whole world could ever be won over to Christ. The doctor, how ever, wished it understood that while ever, wished it understood that while he was not exactly an optimist he was no more a pessimist, for he had perfect faith that the great desideratum would yet be accomplished. Again resorting to the chart he showed a minister to every 800 souls in the United States, against a ratio of 1 to 400,000 in pagan lands. He quoted the words of a celebrated divine, who recommended that every nastor of a charge resign and brated divine, who recommended that every pastor of a charge resign and become a missionary, adding that in many cases it would be better for the people, certainly better for the preacher, and the poor heathen would surely stand a chance of being reached much sooner. "Thanks be to God," said the speaker, "while we may not convert the world, we may evangelize, it, and that, too, in this generation. And once that is done God is bound by His own promise to fulfil the rest by

His own promise to fulfil the rest by overthrowing Satan, sin and death, and setting up His kingdom here on earth." Rev. H. C. Mabie, home secretary of the American Baptist Missionary Union, was the next to take the platform. He was glad when, a couple of years ago, upen his election to his present office, the board had seen fit to send him on a upen his election to his present office, the board had seen fit to send him on a flying trip to the scenes of actual work among the pagan tribes of India, Africa and Japan. He had learned much by personal inspection, which had been of assistance to him in counseling candidates for foreign missionary fields. Throughout his address the secretary dwelt on the great power of increasing civilization as a Christianizer, holding that in God's sight even a soulless corporation, such as a steamship company, often wielded a vast influence for good. He pointed to the city of Tokio as a foreign metropolis almost entirely controlled by business men from outside nations, and remarked that in that one city there were not less than 38,000 native students in government schools under the training of teachers from such institutions as our own Harvard and Yale or England's Oxford. This was a great factor in the work nearest the speaker's England's Oxion.
factor in the work nearest the spea factor in the work nearest the speaker's heart, and by this and numerous other methods, as well as by direct gospel dissemination, he confidently hoped for the early winning of the world to Christ.

Christ.

Today many of the delegates will visit the Baptist College west of the city and tomorrow all will join in a mission service at the First Church, conducted by Rev. Mr. Bunker, late of Burmah.

Again Raining.

The rain commenced again early yesterday morning, and showers fell at intervals during the entire day. The rainfall up to 5 o'clock yesterday afternoon, as reported at the Government weather office, was 05 of an inch, bringing the tetal for the season up to 6.09 inches.

This system of practice is effectual in the care of Catarrh, Throad diseases, Bronches of the Catarrh, Throad diseases, Bronches of Catarrh, Throad disposition to remain passive, a peculiar sensitiveness to the effects of cold; also breathlessness upon moving or ascending a hill or stairs; a slight, hacking cough, with or without expectoration; flying pains throughout the chest or back or under the shoulder blades. These symptoms are more noticeable toward or in the night; slight fever in the afternoon. Cold feet and hands, and in many cases a blue lividity of the lips and roots of the finger nails.

It is unnecessary to give the symptoms in the more advanced stages of consumption, as there is scarcely a family in our State wherein its ravages have not been felt to a greater or less degree, and while this is true, it is no less true that had those persons who became the easy victims to this foul destroyer during the early stages of their disease partaken of the benefits to be drived from using the Aerean system of practice, nine-tenths of them might have been permanently cured, and while easy the sound of the disease partaken of the bronchial tubes and lungs which nothing will kill or destroy equal to the Medicated Inhalations, when properly applied.

Persons taking this treatment can use the remedies at home as well as at our office.

The contest over the admission to probate of the will of Bernard Dubourdieu, deceased, came on for hearing before Judge Clark in Department Two yesterday and occupied his attention for several hours. The contestant, Miss Mariquita Dubourdieu, who claims that the will offered for probate is not the last made by her father, was represented by Messrs. Anderson & Anderson and Smith, Winder & Smith, while Messrs. T. D. Reymert and Jesse Har-desty appeared for the proponents. CHAMBER OF COMMERCE.

Regular Weekly Meeting of the Board Directors. The board of directors of the Chamber of Commerce met yesterday afternoon at 8 o'clock.

There were present Directors Wells, Forman, Klokke, McGarvin, Francisco, Jevne, Johnson, Breed and Braun. C. M. Wells occupied the chair. The committee appointed to visit the

Soldiers' Home made a brief statement and was granted further time in which to prepare a report.

The secretary tendered a financial statement showing a balance of \$625. Bills to the amount of \$85 were read

and ordered paid.

The Committee on Ways and Means reported that it had examined the secretary's books and minutes, and found

them in ship-shape order.

The Committee on Membership reported, advising that six members be dropped for non-payment of dues. The report was laid over for one week. The secretary was instructed, on motion, to forward to Senator Felton a copy of the bill recently recommended by the Chamber making Los Apreles.

On motion of Director Klokke the secretary was instructed to communicate with the Chamber of Commerce of

San Diego and ask it for informa-tion with regard to the fight they are making to have the Pacific Mail steamers touch at that port, and make a tender of the assistance of the Chamber of Commerce of Los Angeles.
The board then adjourned.

A BLOODY FIGHT.

Serious Affray in a Low Aliso Street Den.

ne Man Probably Fatally Injured-Three Men and Three Women Taken to the City Prison-Cause of the Difficulty.

At 6 o'clock last night a bloody fight took place in an old shanty on Alise street opposite the brewery. The place is occupied by a lot of low Mexicans, Italians and negroes, who have given the police considerable trouble for months past. They live together like a lot of wild beasts and the women are from the

Hardly a night passes that there is not a drunken fight, and in each case the participants are more or less inwilling to inform on each other, and for that reason the police have been unable to do anything. The fight last night will, however, probably break the gang up, as one of them was probably fatally shot and beat over the head, and three women and two men who had a hand in the fight were lodged in the city

The gang got drunk early in the evening and an ugly little Mexican named Bernardino Castillo armed himself with an old-style Colt's revolver and started in to clean the crowd out. The first man he ran across was Francisco Grajiola, an Italian who has been living with the gang for several weeks and took up with Castillo's woman.

As soon as Castillo declared himself

the gang began fighting among them-selves, and Castillo brought his old rusty pistol into play and three or four shots were fired in quick succession. All escaped being hit except the Italian and The ball ranged down and came

out under the left ear.

As soon as Grajiola fell Castillo jumped on him and began to batter him over the head with the pistol, and he was still engaged in his occupation

was still engaged in his occupation when the police arrived and put the whole gang under arrest.

Two or three got away before the patrol wagon arrived, but the officers landed the man who did the shooting and another Mexican and a negro and three women in the city prison, and Grajiola was taken to the receiving hospital

hospital.

The women and the rest of the party The women and the rest of the party were too drunk to give their names, and declared that they had no names. They were locked up and will probably be given a long term in jail, as they being to the lowest gang of toughs that this city has ever been troubled with. Drs. Murphy and Bryant were called in as soon as possible and made a careful examination of the wounded man. The only wound found is in the head and it will prove fatal unless he has the

and it will prove fatal unless he has the constitution of a horse, for the ball passed a distance of several inches through the brain, and his skull was fractured in several places from the pistol blows.

After several efforts he managed to make a statement to Police Bailiff Appel, but he denied that Castillo shot him

but he denied that Castillo shot him.

"We quarreled," said he, "and my
friend began to shoot in the air, but he
did not point the pistol exactly at me.

When he got tired of shooting he ran
up to me and knocked me down and began to beat me over the head with his
big pistol. We have been good friends,
and I don't know why he should act that way. The women in our house be-longed to all of us and he had no right to get quarrelsome about any one of them. I don't think he wanted to kill me."

Grajiola then became partially un-conscious, and it is more than probable that he will never speak again, as he has three or four wounds on the head that would knock any ordinary man out. He was covered with blood from head to foot and presented a most horrible appearance when taken to the hospital.

Every mother in Los Angeles has the opportunity today to get a finished cab-inet photograph of her baby, free of all expense, if she will only take it to the Boston Railroad Photograph Car, which is now standing on the Southern Pacific track, just east of the old San Fernando street passenger depot.

BARN-YARD ARISTOCRACY

Fancy 'Poultry on Dress Parade at the Armory.

A Look Through the Various Coops Yesterday.

The Close of the Poultry Exhibition this Afternoon.

Ball for the Wind-up this Eveningof the Exhibit-An Admir-

reverberated a hundred and fifty times a minute was the salutation which the visitor to the poultry show received yesterday morning. The blue-ribbon cocks were undoubtedly celebrating their victories, as they have a right to do in poultry politics, and perhaps some of those who had suffered defeat were jawing back their disapproval of the result, and making allegations against the returning boards. A lot of big Partridge and Buff Cochins with base voices were about the noisiest delegation in the hall. They had just arrived from Pasadena and were still in their canvas-covered transportation boxes, They had not yet been given a chance at the various colored ribbons and were fresh for the contest.

Nearly a week of close confinement in the exhibition coops, breathing the more or less vitiated atmosphere of the hall, had begun to tell on a good many of the more tender birds; consequently they were taken out and sent home to recuperate on the ozone of their native fields and groves. Their places were supplied with fresh birds, and the con-sequence is that the show goes on with unabated attractiveness. Yesterday unabated attractiveness. Yesterday and last night there was a fair attendance, considering the weather. Today will close the exhibition, and this evening the coops will be cleared out of the hall and the affair will be wound up with a dance. For this the regular exhibition tickets, costing 25 cents each, will give admission.

The poultry show, taken all.

The poultry show, taken altogether, may not have proven a brilliant financial success, but in every other way it has been a triumph. Ten years ago such a collection of birds in New York such a collection of birds in New York or Chicago would have created a great sensation. In fact, such a collection would not have been possible ten years ago for the reason that many of the breeds here represented have been originated since that time. It is only just to say that, in the few years that Southern California has devoted to introducing and broading floof forly. ing and breeding fine fowls, it has forged to the very front rank, accomplishing wonders. No country in the world offers a more satisfactory climate or more favorable conditions generally for fancy breeding, and no people are better fitted for taking hold of the in-dustry in a thorough and scientific way. Had it not been for the Poultry Association, whose third annual exhibition is now closing, nobody would dream of the progress which breeders of South-ern California have made.

In the present show the Leghorns, as usual, have found strong representation. The browns take the lead, with some magnificent specimens, and there were also representatives of the white, the black and the buff.

There is a full showing of white-faced Black Spanish, with some of the finest birds ever seen in any country.

A dozen or more coops of silver-spangled Hamburgs exhibited creditable specimens. The exhibition of games ran rather light. The bantams were pretty fairly represented as to classes, but not fairly represented as to classes, but not in great numbers.

In the Asiatic and other heavy breeds
-representing the most practical allpurpose fowls-the showing was most admirable. One pair of prize-winning Light Brahmas was sold at auction Thursday evening for \$50—and they are worth the money. A pair of Partridge Cochins sold yesterday for \$50. The black, white and mottled Lang-shans attracted a great deal of atten-

The barred Plymouth Rocks were not up to the highest standards. The Wyandottes were represented by some very fine birds of the golden, silver-There were some Black Minorcas, al-

so choice.

The exhibit of ducks, geese and

pigeons was not large, but some fine specimens were shown. There was an unusually full line of incubators on exhibition and they attracted a great deal of attention. Several were sold during the show. There was also a considerable demand for thoroughbred eggs.

In a certain sense the managers of the

show sat down between the chairs—or two chicken coops—this year. They were given assurances that 1500 East-ern birds would be here for exhibition, and they made plans accordingly, and announced the attraction. Somehow the Eastern breeders fell down. There were only six Eastern birds in the show. Doubtless many local breeders were timid about facing so large an Eastern contingent as was promised and did not want to make the entries that they would have done for a purely local affair. If the managers had known that they would have to rely on home fowls, and if they had worked on that basis from the start, they would have been able to get up a more attractive exhibition.

It is expected that the attendance to-

day will be the largest of the week, as special attractions have been provided.

At present they are the nearest of those unsolved mysteries that cover the vast field of astronomy with interesting problems. The observers are adding fact to fact, and the ingenuity of scientists may find the explanation for the causes that lie beneath the dark spots on the sun and the sympathetic disturbances on the planets that follow him.

While it is true that the cause of dis-

Indeed, any student of nature could find there a most profitable theme, and a cause of wonder that. by processes of selection and methods of breeding, a branch of the feathered tribe should be brought so completely under the control of man. When mankind learns to work with Nature, and further her processes of evolution what astonishing results are achieved! It seems that the breeder is able to evolve at will a large or a small fowl, a fowl with short or long legs, a white face with black plumage or a black face with white plumage, a magnified comb ost no comb at all-to vary the rd in a hundred ways and to combine as many idiosyncracies in any one of that he desires. spots-the largest number noted in a single year of modern times-the influ ence of an equinox of Saturn was merged into that of Jupiter. A Saturnian period of disturbance is supposed to last for six years. When the periods of two planets occur simultaneously, or close together, the influence is believed to be considerably augmented. We are now approaching an equinox of Saturn. Its disturbing influence has been at work about two years and a half, and will continue operative three and a half years longer. The major equinox of Jupiter will occur in June, 1895. So it is manifest that Saturn's period laps over upon Jupiter's and the wo influences are, in a manner, united.

Meanwhile the lesser planets-Mars, the Earth, Venus and Mercury, which revolve in their orbits more rapidly and in various periods, bring about a succession of equinoxes which join their disturbing influences for short times with those of the large, exterior plan-

The sum of all the planetary perturbations joined at any one time determines the electric tension, or potential, so to speak, of the planetary system, and it is during these periods of high tension, or just preceding or following them, that most of the sun spots, the magnetic, electric and atmospheric disturbances occur.

much a mystery as in the infancy of science.

The coincidence of sun spots, magnetic storms and auroral displays points to a common or allied cause. We do not yet know what makes a sun spot, nor why sun spots should be followed, at longer or shorter intervals, by magnetic disturbances and auroral displays on the earth, or why, when the latter begin, they do not continue as long as the sun spots are in existence.

Yet the intimate bond between the sun and the planets is shown by the phenomena. The influence of the giant body and ruler of the system on the planets is not alone that of light and heat and the attraction of gravitation that holds them in their orbits. The appearance of a storm on the sun is followed by magnetic disturbances on the earth, and they doubtless affect every member of the system. While a magnetic storm is not commonly noticeable by atmospheric effects, it is very evident to those who have to deal with electricity or electric apparatus. Unless it appears in GRAND OPERAHOUSE .- The Jefferson co pany repeated The Rivals at the Grand Operahouse last night to another large and delighted audience. The play was as rapturously received as on the opening night, and the valorous "Bob Acres" and the de-liciously blundering "Mrs. Malaprop." to-gether with the other members of the fine ompany, kept the house in a roar. This afternoon the play will be given for the last time, and tonight The Heir-at-Law will be produced, Mr. Jefferson appearing in the great part of "Dr. Pangloss." This will be perchance the last time Los Angeles will ever witness the matchless acting of Amer-ica's world-famous player, and a great house will doubtless be in attendance to say to him, farewell.

Los Angeles Theater .- Damon and Pyth-Los Angelles Theater.—Damon and Pythias, the great historical drama by John Banim, was the attraction at the Los Angeles Theater last night, the play having been performed in the interest of the K. of P. Bureau of Relief. "Damon" was played by Charles Elierby, "Pythias" by W. C. Stone, "Dionysius" by D. H. Burts, "Calanthe" by Mrs. E. S. Laurie and "Damon's child" by Little Sylvia and the other characters by well-known amateurs. The production was fairly successful and as a good house was in attendance the object aimed at—the rein attendance the object aimed at-the re plenishment of a charitable fund—was no doubt fully accomplished. The famous novelist, George W. Cable, will read selections from his works this even-

MUSIC AND MUSICIANS.

SIMPSON AUDITORIUM.-The admirable Simson Auditorium.—The admirable programme prepared by Mr. William Foran for his concert brought out a large audience in spite of the vivid attractions elsewhere. Almost every humber was in itself aspecial feature, for each was given by a finished performer, and there were no spaces filled up with mediocre talent.

The overture, from Freischutz was rendered, as it is possible to do, with a violin, organ and plano, by Prof. Stamm and his assistants, Miss Percival and Mrs. Jennings.

The aria, from Mendelssohn's "St. Paul." The aria, from Mendelssohn's "St. Paul, sung by Herr Rubo, showed him at his best, true singer of oratorio—serious, dignified, finished and rising, at the climax of the song, to a magnificent point of fervor without the se of a single meretricious trick of vocal use of a single interetricious trick of vocan-zation, and leaving always a sense of rest, reserve and completeness. Many of the same striking merits are perceived in Mme. Rubo, who possesses a voice of immense power and equal sweetness, and who sang the dimcult aria from Catharina Cornaro, and "Ach Mein Sohr," from Eury-anthe, with a really thrilling power and pa-thos.

thos.

Mr. William Foran's solos were the "Account of the Holy Grail," from Wagner, and Gounod's "Ave Maria." In the first of these, one of the most trying tenor parts ever written, Mr. Foran's technical skill and control over harmonic difficulties was evident, and in the latter the sweetness and feeling of which he is so willy carnels. and feeling of which he is so fully capable The fourth number was an arrangment for The fourth number was an arrangment for the flute, which was skillfully played by Sig. Stanzione, who showed, in spite of a slight hoarseness, a good command of his variable and sympathetic instrument. Another soloist of the evening was Mme. Helen Parepa, who has already won a secure standing among the musically-wise for her clear interpretation, perfect knowledge, and the truth and purity of her renditions.

The most successful of all the numbers

The most successful of all the numbers was the trio from Withelm Tell by Messrs. Foran, Rubo and Taylor. The splendid music and the spirited and beautiful rendering fairly awakened the audience to a sense of what they were hearing, its novelty and its charm, and they were not contented until a larger part of the number was repeated. The programme ended with the quartette from Lucia, and ended also a notable event in concert singing.

RAILROAD POLITICS.

Redondo Beach Compass.

[Redondo Beach Compass.]

From Stanford to Stoneman, from Farley to Irish, from Gorham and Sargent to Felton, from Beerstecher to Rhea, from one Senator and Representative to another, the Southern Pacific has aimed to control the politics of California, both Democratic and Republican. At the great non-partisan meeting held in San Francisco a few weeks ago the just indignation of a long-suffering people was fitly voiced.

That meeting certainly presented a grand spectacle. Grand, because of the eight thousand representative citizens in immediate attendance and behind it; grand, because it helicated a golden truth, stified by years of oppression; grand, because it had not been even dreamed possible for any considerable number of people to get together and denounce, as that meeting did, the leading cause of misrule and corruption in Camfornia. Judge Wallace was certainly a Hereules among his fellows when he dared to go beyond the weather-beaten trail and call the atwhen he dared to go beyond the weather-beaten trail and call the attention of the grand jury to the innum-erable vices born of the sway of the Southern Pacific Railway of this State; and he and that fearless body of men who dared to suspend the guillotine of justice above the heads of a gigantic combination of law-defiers deserve the commendation and applause of every decent person.

by the machinations of the great corporation indicated, Judge Wallace and his jury were defeated in their good intentions by a decision from a Supreme Court notorious for its shut-tle-cock policy (we speak mildly.) But that Supreme Court which abides in the hearts of the masses of the people of California has approved the course of the fearless judge and his equally fear-less jury, in spite of the order made against them.

We sometimes hear that nothing can withstand the devil-fish grasp which the Southern Pacific Railroad has on the politics of the State, but the Compass loes not subscribe to such a sentiment We hold that right here in California, where the corrupting and degrading practices of the Stanfords and the Crockers have made cowards of the bravest, where purchased votes have driven into retirement the most incorruptible and fearless, and where suc essful fraud and unrehuked crime have nearly made worthy ambition and hon-orable aspiration a broken reed, there is still something left to strive for. All the people are not chattels and merchan-

We are encouraged to hold to this entiment by such manifestations as that heroic meeting in San Francisco, together with other indications of like character that have been observed in different parts of the State. These honest and fearless expressions of the people mean that they are not only courageous enough to point out the au-thor of our debasement, but that they

are ready to go still farther and forever suppress its power for evil. But this will be no easy task. Ut-terly lost to every sense of decency the marplots who have sought to tighten their vicious grasp on the resources of the State from year to year will not be easily shaken off. They will be in the field at all points. Their policy will be peculiar to them-sclves. They will employ any per-son whose soul can be bought with gold; for, be it known, the Southern Pacific Company has no politics. While nominally Republican the men at the head of that corporation do not scruple to take every advantage that may be gained under Democratic domination. As evidence of this we have but to cite the all-powerful influence of Leland Stanford during the administration of President Cleveland, when he and his faithful lieutenant, Stephen J. Frield, Justice of the Supreme Court of the United States, manipulated and controlled at least five-sixths of the federal appointments on this Coast. This, too, in the face of the corresp practices of these men and their had standing with the Democracy of Carteonia, which had been particularly expressed but a few months previously by the honest and unfettered representation of that and unfettered representation of that party in the State convention at Stock-ton.

True, a few excellent appointments

were made, but this was owing entirely to the persistent efforts of certain Demo-cratic Senators east and south. But Stan ford and Field's policy, so far as Cleve land was concerned, was to throttle, gag and strangle every atom of the sentiment promulgated at Stockton, which properly held them up to the world in their true colors; and they almost succeeded.

This may be strong language for some of our straight-laced, tounged and grooved Democratic friends; but they know it is the truth. They know that the acknowledged leaders of the De-mocracy of the State of California had no more to do with Cleveland's policy hereabouts than did the wanderer upon the deserts of far-off Araby; they know that White, nor Hearst, nor Foote, nor the deserts of far-off Araby; they know that White, nor Hearst, nor Foote, nor Pond, nor English, nor Sullivan, nor Taipey, nor Delmas, ner Dunn, nor Berry, nor Henley could even sign a recommendation for appointment or make a suggestion as to party policy unless it were with an accompanying remark that it would do more harm than good. And yet these men were the real Democratic leaders of the State—men tried and true, whom of the State-men tried and true, whom the people trusted and revered. The Democrats of California know that all the way from John P. Irish (a representative of Stanford and Field, who acted for years as the conductor of Stanford's so-called Democratic organ in San Francisco, and who received innumerable favors from Cleveland) to Star ford's lacky, Rathbone (who was made consul-general to Paris,) a studied ef-fort was made to reward the tools of Stanford, while ignoring the real Dem ocrats of this State.

But it is unnecessary to go farther in summing up the evidence of the prodigious influence wielded by these notorious corruptionists upon the Cleveland administration. The reading, thinking and observing people know all the facts as well as we do, and those who are manly and honest will admit them. We manly and honest will admit them. We simply refer to them in order to show how firmly intrenched the common enemy is. But they should be forced to let go teeir hold. That they may be is certainly the desire of everyone with the slightest promptings of pride and manhood. So long as the present conditions prevail, any man in California may be subjected to the political railroad's vindictive lash.

Its discussion was resumed in the House again today upon the presentation by Mr. Bland of a letter in re sponse to one of Mr. Harter's circulars to the Grand Army of the Republic. The scene was one of confusion and excitement at times, but occasionally good home thrust from one side or the other brought forth hearty and con-

tinued laughter. Mr. Harter characterized the free silver bill as "infamous," and predicted that if it passed the Democratic party would march to certain defeat in November. Warming to the subject he declared: "If this free silver bill shall pass, the time will come when a man as a Democrat will not be given a decent burial in a Democratic cemetery.' peated attempts were made by points of order and demand for the regular business to take Mr. Harter from the floor, but he persisted in presenting his views to the House and the latter was compelled to hear.

WASHINGTON, Feb. 19 .- [By the Associated Press.] Senate. — Resolutions were presented requesting the Presilent, if not incompatible with public interests, to inform the Senate of the proceedings recently had between representatives of Canada, the British government and the United States as to the arrangements for reciprocal trade with Canada. Referred to the Committee on Foreign Relations.

The bill to continue in force for ten years all existing laws prohibiting and regulating the coming into this country of Chinese persons was taken from the calendar and passed.

The bill is a substitute for a similar measure introduced by Senator Dolph. In addition to reënacting the present exclusion laws, which are about to lapse, it contains a section intended to meet the difficulty which Treasury offi-cials have encountered in returning Chinese to China through judicial decisions adverse to their right to return them further than to the country from which they entered the United States. Under this construction of the law the Freasury returned a number of Chinese were soon again smuggled across the line, which it was impossible to guard at all times and places. House.—The House went into committee of the whole on the private calendar. The first bill, which was laid aside, gave rise to some discussion, dur-ing which Mr. Reed made some of his characteristic remarks as to the advisability of counting a quorum from members present and not voting. The chairman and Reed thereupon had a short colloquy, which the chairman sub-stantially alluded to as an "alter-

The next bill, for the relief of A. J. Duncan of Tennessee, was the axle upon which revolved another silver wheel. It was set in motion by Mr. Bland, who sent to the clerk's desk and had read a sent to the clerk's desk and had read a letter from a Grand Army post in Mis souri asking him to inform the g man from Ohio (Mr. Harter) in res the gentle to his anti-silver circular that the Grand Army posts were able to attend to their own business. Mr. Bland again criticised Mr. Harter's attitude on the

Mr. Harter said the House had been Mr. Harter said the House had been told that one class of legislation fell heavily upon ainety-five cistzens out of every 100 and took away their property and handed it over to the other five under the operation of the McKinley law, but there were other burdens, and some gentlemen seemed to think it was perfectly right and very Democratic, indeed, to take the earnings and property not of 95 persons out of 100, but of 999 citizens out of every 1000 and hand them over to monopo lies. He (Mr. Harter) spoke for the clas of people who had no vote. He spoke for the helpless women and children of the country; for the poor creatures who labored over the washtub for the support of helpless families. That was the view of Democracy he took. If this free silver bill passed the time would come when a man as a Democrat would not when a man as a Democrat would not be given a decent burial in a Demo-cratic cemetery.

Mr. McKinney of New Hampshire raised the point of order that the dis-

ussion was entirely out of order, not eing directed to the bill under consid-ration by the committee.

The Chair sustained the point and

stated that the bill under consideration was one for the relief of Duncan of

was one for the relief of Duncan of Tennessee.

Mr. Harter replied that his remarks were directed toward that bill, as if Mr. Duncan got an appropriation he wanted to be paid 100 cents on the dollar. [Laughter and applause.] Mr. Harter then proceeded to make a prediction, but as the words "I predict" came forth he was again interrupted by many Democratic members. After many efforts he again managed to secure the floor and proceeded with his prediction, which was that if the House passed a measure which invited all degraded silver of the world to free coinage in this country the Democratic

party will lose the votes of the men who labored for their living, and when the party marched up to the polls in November instead of marching to overwhelming victory it would march to certain defeat.

Mr. Lind of Minnesota asked if he understood the gentleman correctly in defining the principles of the Democratic party to be free trade and a single gold standard. Before Mr. Harter could reply he was again interrupted by a number of Democrats protesting against the latitude of the debate.

Mr. Lind. Is the position of the Democratic party for free trade and a single gold standard!

Harter. The position of the Democratic party is in favor of a double standard and in favor of keeping every dollar worth 100 cents. [Applause on the Republican side and demands for the regular order from the Democrats.]

Mr. Lind pressed the question as to the attitude of the Democratic party in regard to free trade, and Messrs. Fithian and Holman in valin attempted to take Mr. Harter from the floor, when he demanded to make his reply.

Mr. Harter said he would do so. This man from Tennessee wanted an appropriation. In order to get the treaty be-fore the Senate as soon as possible it was arranged that Lord Salisbury should communicate his action by cable. So far nothing has been heard from him. nta Fe's Right-of-way to Sa Monica-How "The Flyer" Bene--Notes.

An Associated Press dispatch from San Francisco says that Chief Engineer Hood, of the Southern Pacific Company. has definitely located the line of the coast division from Santa Margarita to Ellwood. All rights-of-way have been granted to the railroad company and work has been commenced on the faces of the tunnels. It was at first intended to run the road inland, but it strikes out from San Luis Obispo for the coast and follows the coast line for most of the distance to Ellwood and Santa Barbara. The distance from Santa Margaby fixed survey is greater than the line at first proposed, being 180 miles, while the other is less than 100, but the coast line will be cheaper to construct, as it does not run through so mountainous a country. There will be heavier and rougher work on that part of the line between Santa Margarita and San Luis Obispo thau there was on the California and Oregon road in Sis-kiyou. Mr. Hood says there will be seven tunnels in the first sixteen miles, one of them being 3000 feet in length. F. S. Douty, of the Pacific Improvement Company, said that contracts had not yet been let for the construction of these tunnels, but that preliminary work was being done and as soon as bids were all in and the acceptable one chosen there would be an immediate commencement of work.

commencement of work.

It is a surprise to many that the line has not been located so as to include and absorb the Pacific Coast Railway. It is thought one object in choosing the coast line is to make the road a "scenic line" for passengers. It will not run through a single town of any size for the whole distance of 180 miles. It will reach the extreme edge of Point Concepcion, and will run within eight miles of Lompoc. From Point Concep-cion to Ellwood it will run across many arroyos that gash the coast line and fre quent bridging will be necessary.

SANTA FE'S SANTA MONICA LINE. It has been stated that the Santa Fo had secured the right-of-way needed for the new road to be built between inglewood and Santa Monica. This is Inglewood and Santa Monica. This is an waid to be erroneous, there being three pieces of the right-of-way yet to be obtained, though it is expected that within a few days the matter will be clear. Work for this object is going ahead every day, and once the way is wholly clear the construction will regrin.

NO CHEAP BATE TO CALIFORNIA

It has been stated that President Manvel, of the Santa Fé, had asked the Transcontinental Association to authorize a second-class passenger rate of \$14.90 from Missouri River points to California, and had won friends in this section by his efforts to induce immi-gration by that means. An Associated Press dispatch received yesterday says that Chairman Vining announces that the association has refused to authorize

The present week has so far been a good one for small parties and surprises. A most pleasant affair held on Thursday evening was at the home of A. G. Subduing the Babbits Growers all know the pestiferous rab-bit; how easily and rapidly he girdles trees in your orchards, and the difficulty bit; how easily and rapidly he girdles trees in your orchards, and the difficulty is to keep the fellow out. An exchange announces that G. A. Hanson of Chino Valley has a remedy that is not only cheap and simple, but effective. To one pound of aloes add the essential oils of the leaves of the blue gum and those of the pepper tree; the quantity to be about a quart measure packed with leaves. These are grated with an ordinary grater, after which pour over each (separately) two quarts of boiling hot water, and over the pound of aloes four quarts. Let it stand for a few hours, thee put all three into one vessel, making eight quarts of liquid with which to wash the base of the trees. The adhesive quality of the essential oils of the foliage gives a permanency to the wash when applied that will remain on the trees for a long time. Trees submitted to an application of this solution last August have been left severely alone eversince by the rabbits.

New Patterns and the new spring Metropolitan Catalogue of Fashions are now in. We will show today a bigger lot of new Dress Goods in the Chinese designs yet produced this season. The Dress Goods Department is receiving more than its share of attention, and will display new styles, cheaper goods and a greater variety than ever before. The new all-wool Challies are unusually choice this season. Everything is running to flowers, and the designs are worked out most wonderfully near to Nature. The new Scotch Ginghams have a blending of colors that is truly magnificent. They come in an unusually large variety of checks and plaids that is hard to imagine anything more elegant in designs. The Millinery will run largely to flowers, laces and ribbons, with a lot of new crepe effects in trimmings. The new Millinery will be the choicest in years, and the prices have received a great overhauling. Prices are way down in Millinery of all kinds; about onehalf the usual prices. An elegant lot of bargains have just been placed on our famous bargain tables; 25c, 50c, 75c and \$1.00. Always Enjoyable Ice-Creams, Cakes, Puddings, and other articles in which Dr. Price's Delicious Flavorings of Vanilla, Lemon, Orange, etc., are used have no disagreeable odor or sickly taste, but are always enjoyable.

Their great popularity is mainly due to the scientific manner in which they are prepared, the using of the choicest and freshest fruits. One never tires of using them for they are always the same.

Are still offering great inducements to settlers on the Alessandro tract OF 21,000 ACRES! Which lies only eight and one-half miles distance from Riverside on the west. Ten thousand acres are already sold; 5000 acres are being improved. Between 300 and 400 families are living there today, with churchs, schools, stores and hotels. The Alessandro Tract of 21,000 acres is equal to 35 square miles, and is 12 miles long by 3 to 4 miles in width. A most magnificent valley. With the finest soil in the world for orange or fruit culture; with the best water right in Southern California. No stone or brush on the land. People wonder at the great success and rapid growth of Alessandro until they are driven over the tract, then they are not surprised, and all exclaim: "The half has not been told."

Nature has truly been lavish with her gifts at Alessandro in regard to climate and location, and we predict a much more rapid growth during the next two years than in the past year and a half of its existence.

Interesting exercises were held yesterday ternoon at the Wilson school, especially appropriate to Washington's birthday.

At the Wilson primary the different rooms

REAL ESTATE LOOKING UP. The sale of the Carr place, best known Carmelita, shows which way the wind is blowing in the local real estate market. o many sales recorded as during the past few months, and this in the face of the fact of a windstorm and a prospect of a dry season—a possibility which, happily, did season—a possibility which, happily, did not materialize. The purchasers have been men of wealth, people who have traveled extensively and whose fortunes permit them to make their residence wherever they will. They came to Pasadena because they believe it to be the most desirable residence city in the country, and the money they have handed over indicates that they know a good thing when they see it and are willing to pay for it. Town lots and acreage property, as a result, are placed on a firm footing and the values are constantly increasing. A lady who was offered \$1250 for a piece of property about a week ago yesterday received another offer of \$1350 creasing. Alady who was offered \$1250 for a piece of property about a week ago yesterday received another offer of \$1350 from the same man. And this is but an instance. The buying is not speculative, but prices are based, rather, on the intrinsic value of the property. A new era of prosperity has been fairly inaugurated.

On their way back to Santa Barbara they were held up by two masked, armed men who took the watches and valuables of the travelers and safely escaped. The victims reported their experience to the Sheriff. Officers were put on the trail and when it began to look real serious the perpetrators, friends of they had only played a joke upon the ten-

POLITICAL POINTS.

Hon. Russell Heath, ex-member of the Assembly from this district, has already began to manipulate the political wires of the county. Mr. Heath is an honorable citizen, has lived in this county since 1851, has been Sheriff, Assemblyman and State Senvior, but this county is now so strongly Republican that neither Mr. Heath nor any other Democrat can secure an election from this district. Those who recall the result of the election two years ago know that when the Republicans start in they are bound to win. It is asserted that Mr. Heath is "working" the Farmers' Alliance to support Cannon, president of the Alliance, for the State Senate and himself for the Assembly from this county. POLITICAL POINTS.

REDLANDS.

The City Trustees held a long and im-portant session on Wednesday evening, and a large amount of usiness was disposed of portant session on Wednesday evening, and a large amount of usiness was disposed of by the hour of adjournment. The members of the board and all the appointing officers, knowing that business of imporfance was to be transacted, were everyone present.

The first business was the consideration of a request made by the Southern Pacific Railroad Company through Col. T. J. Wilson, the company's agent at San Bernardino, with Will A. Harris as the attorney, asking for an expression of the board by resolution showing the attitude of the trustees respecting the use of Park avenue through Lugonia Park by the Southern Pacific Company for a railroad right-of-way. Representatives for the Santa Fs, with Judge Brunson as their attorney, were present and objected to such expression being given by the City Trustees. The case was argued pro and con for two hours. The Southern Pacific people made the claim that, having paid property owners all damages asked because of the use of the avenue for the railroad, and having the unanimous consent of property owners and trustees, they had a right to ask an expression of opinion from the trustees in session. The resolution was saked for at this meeting to have for use at the injunction proceedings before Judge Cope the following morning. The objection was made by the Santa Fs people that such an expression should not be given, as the right to use all the street.

The following resolution was, however, presented and passed by a unanimous vote: "Resolved, that the Southern Pacific Railroad Company and the Pacific Improvement Company, corporations, be and they are

presented and passed by a unanimous vote:
"Resolved, that the Southern Pacific Railroad Company, corporations, be and they are

[Branch office at Briggs' news stand, cor ner Fourth and West streets, where sub scriptions and advertisements are taken.] Yesterday was a day of accidents in Orange county. Early in the morning the little daughter of William Northeross of Orange, together with another little girl and boy, were riding in a surrey near Orange when the horses became frightened and ran away. The neckyoke dropping from the carriage-tole caused the frightened horses to overturn the carriage, throwing the children violently to tigground. Freeing themselves from the carriage the horses proceeded to town, where they were captured. The little daughter of Mr. Northcross-received a painful scalp wound and a serious bruise. Death is feared from concussion of the brain. The other children miraculously escaped injury other than a severe shaking up and a good scare. While the physician was in attendance on the little girl a man by the name of McIntyre was brought in with a broken leg, having been thrown from a meat wagon in a runaway.

Los Argeles, Cal., Feb. 11, 1892.

After suffering for years with stomach trouble I was at last induced to try Dr. Wong Him, of No. 639 Upper Main street. Los Angeles. He examined me and pronounced my trouble tumor in the stomach. After two months 'treatment, during which time I felt greatly relieved and benefited, he pronounced me entirely cured, and from that time to the present, which is four months. I have not felt the least return of my old trouble. I am able to eat many things which formerly would distress me very much. Therefore I feel that I can do nothing else than to recommend the doctor to all who can be induced to try him. I hereby extend him my most heartfelt thanks for his services to me. THE PUBLIC BUILDING romised Help From a Kentucky Member of the House. The following letter indicates that the

appropriation for enlarging our public building will pass the House. Mr. Caruth, the Congressman from Louis ville, is a popular man in the House. His efforts have secured the necessary and continuous appropriations for the magnificent buildings just about finished in Louisville at a cost of \$2,000,000. The letter for the Kentucky delegation was sent to him and his response shows that there will be important help to the Los Angeles interests, for which our citizens will be very thankful and prove their appreciation thereof if any of the Kentucky members should find occasion to visit our city.

DEATH! People's Store!

February 20, 1892.

A greater sale of dress goods was never heard of in Los Angeles Sixty feet of show window does not display one-tenth of the volume of dress goods we have in this sale. Fifteen to 50 cents per yard saved, according to price, on silks and dress goods. Our entire stock of spring dress goods offered to you at a ratio of 33 1-3 per cent. less than importation price. We have determined to increase the usefulness of our dress goods department, and, in doing so, will spare no means or ends to accomplish our object. You will admit that our merchandise throughout the house is offered so much under price that there is no one really in competition with us.

We are opening up hundreds of cases of new spring and summer fabrics, all the noveities in wash effects, printed goods, which we are offering at New York cost, which means selling you the very latest merchandise at less price than you can buy anything that has been in stock heretofore, even though it be reduced 33 1-3 per cent. Our increased business, in the face of all sorts of sales, proves conclusively that we lead this market. You will find the merchandise in our stores just as we represent it to you in print.
